

Pre requirements for my project

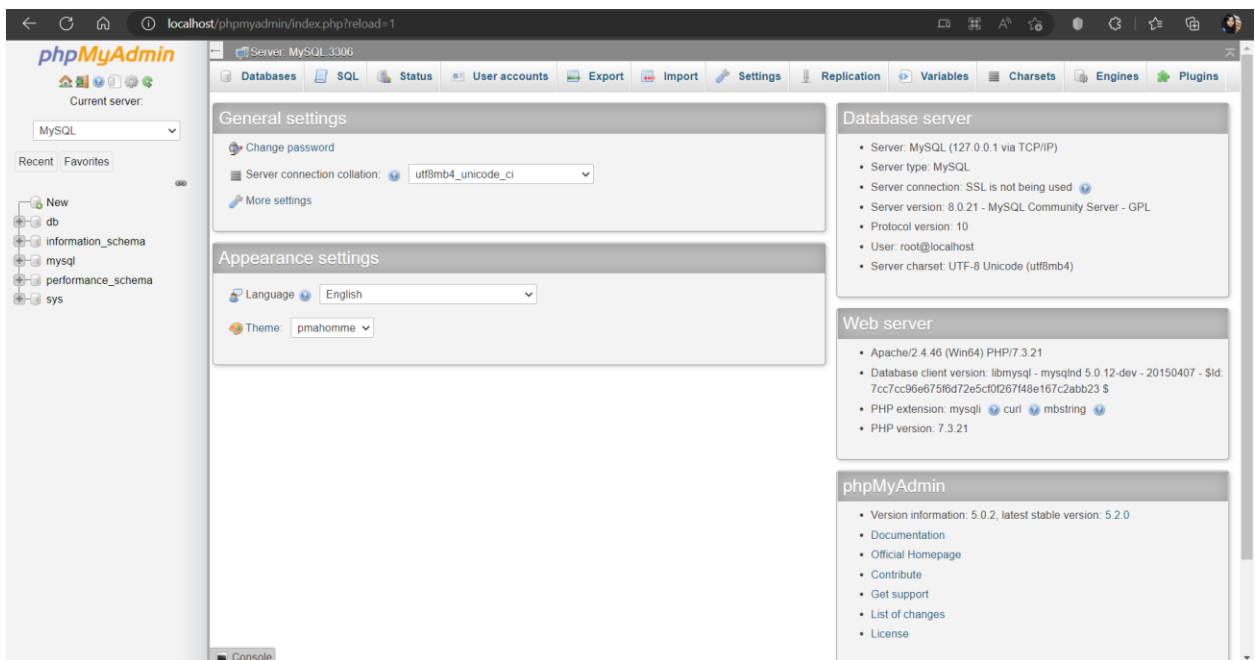

1. Create Database

❖ Create Database using phpMyAdmin

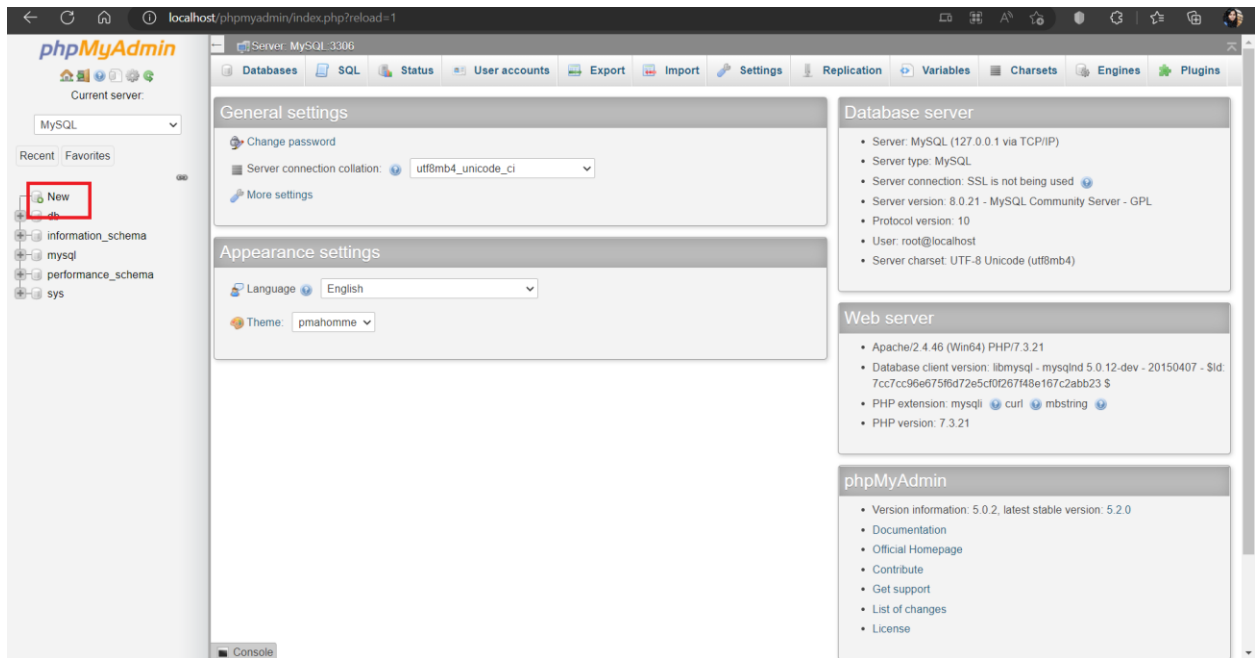

➤ Go to the following URL.

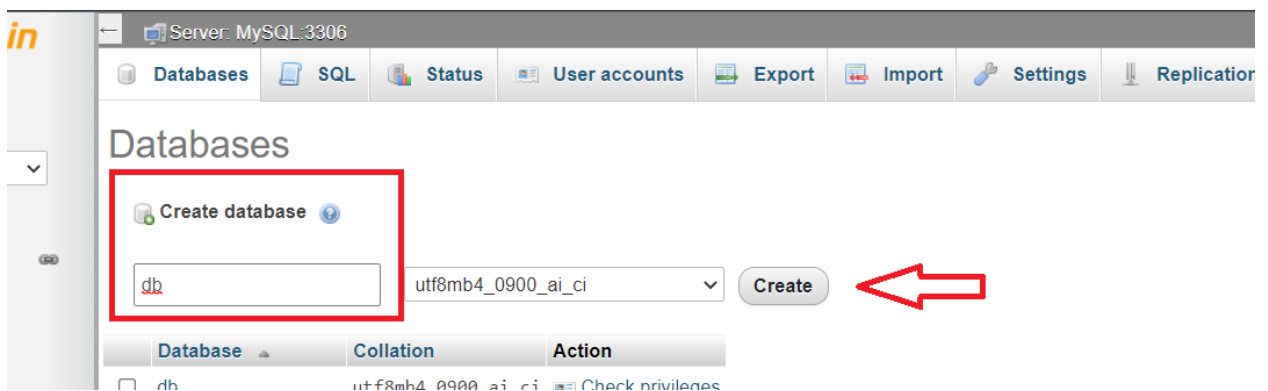

➤ You will see the phpMyAdmin screen as follows.

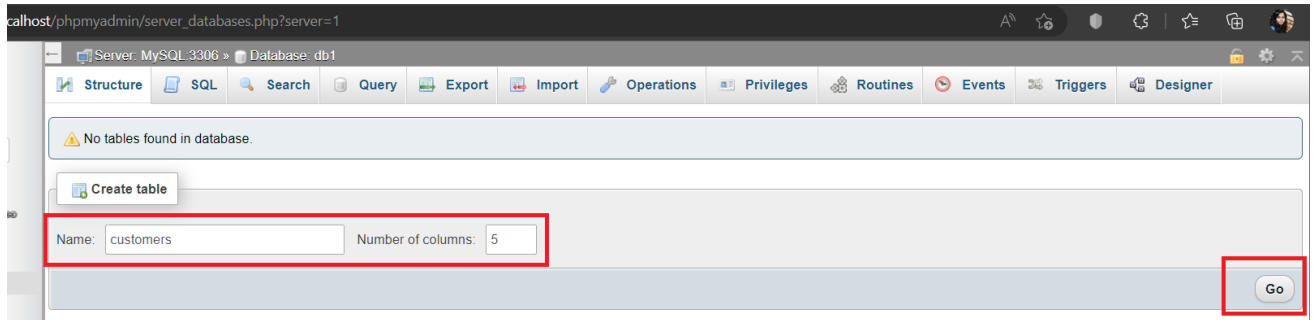

➤ To create a new database click the “New” button on the top left corner as shown in the figure.

➤ After, Enter name of the database as “**db**” and press “Create button.

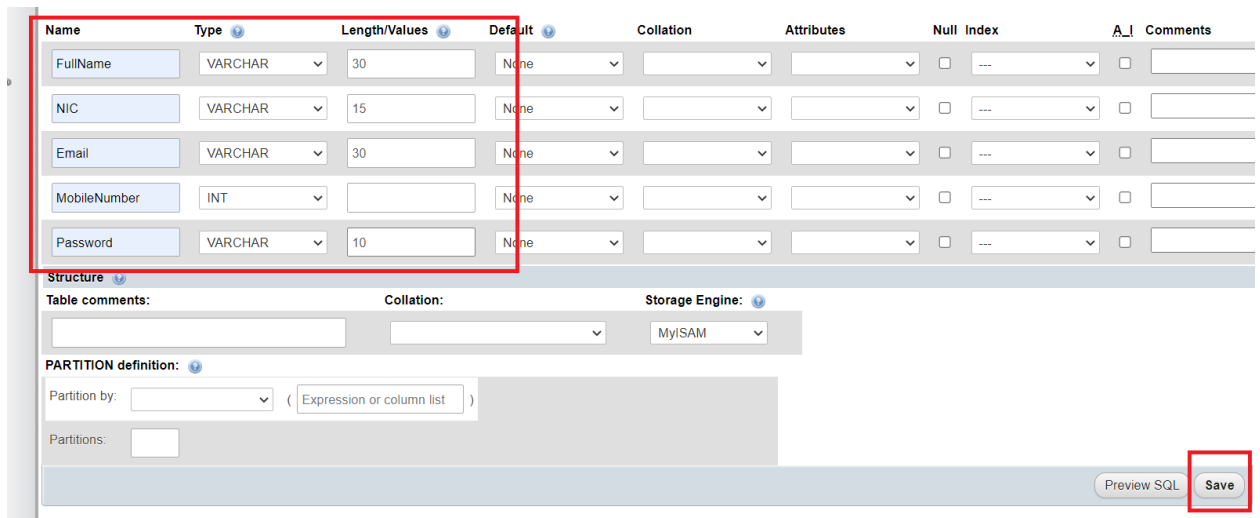

- After that, you have to enter the name of the table as “**customers**” get **Numbers of columns as 5** and press the “**Go**” button

The screenshot shows the 'Create table' form in phpMyAdmin. The 'Name' field is set to 'customers' and the 'Number of columns' field is set to '5'. A red box highlights these two fields. Another red box highlights the 'Go' button at the bottom right of the form.

- You have to enter the details as follows and press “**Save**” button to create the table.

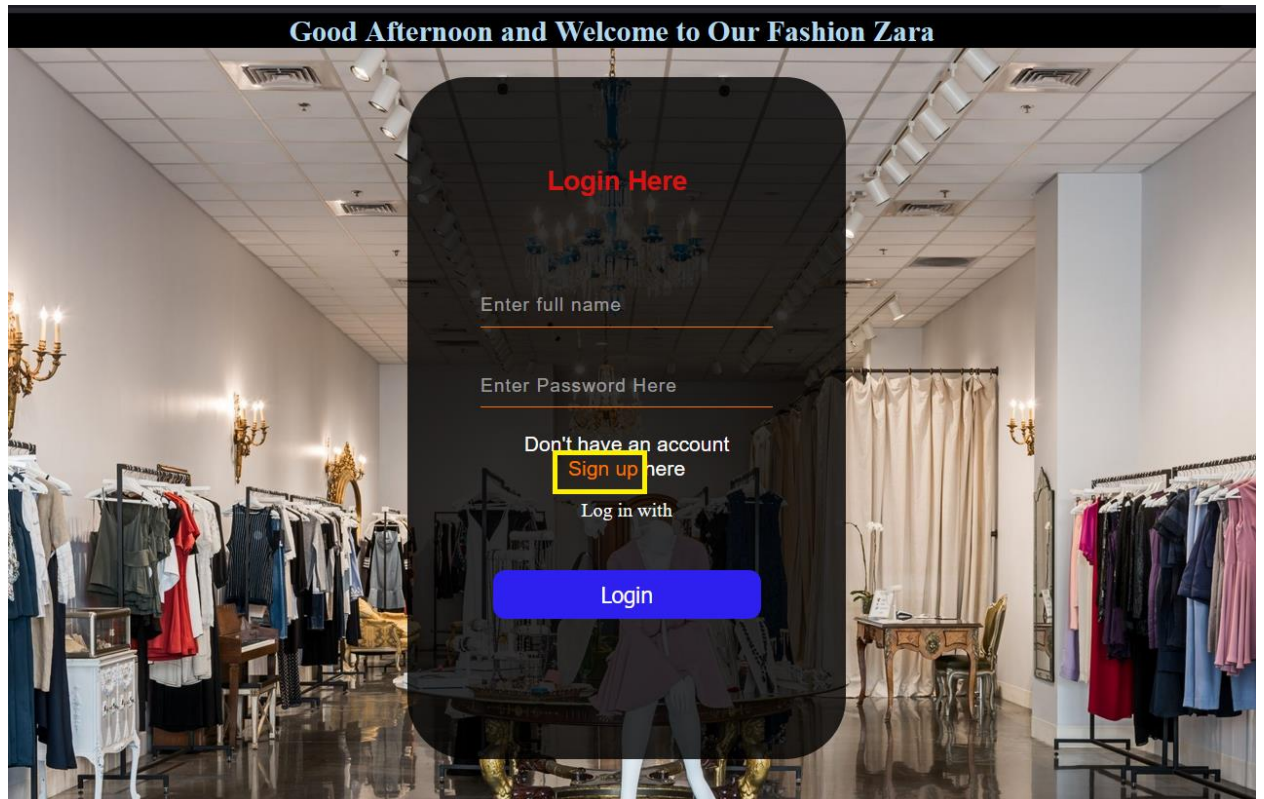

The screenshot shows the 'Structure' tab of the table editor. A red box highlights the columns: FullName (VARCHAR, 30), NIC (VARCHAR, 15), Email (VARCHAR, 30), MobileNumber (INT), and Password (VARCHAR, 10). Below the columns, the 'Table comments', 'Collation', and 'Storage Engine' (MyISAM) are visible. At the bottom right, the 'Save' button is highlighted with a red box.

Name	Type	Length/Values	Default	Collation	Attributes	Null	Index	A.I	Comments
FullName	VARCHAR	30	None			<input type="checkbox"/>	---	<input type="checkbox"/>	
NIC	VARCHAR	15	None			<input type="checkbox"/>	---	<input type="checkbox"/>	
Email	VARCHAR	30	None			<input type="checkbox"/>	---	<input type="checkbox"/>	
MobileNumber	INT		None			<input type="checkbox"/>	---	<input type="checkbox"/>	
Password	VARCHAR	10	None			<input type="checkbox"/>	---	<input type="checkbox"/>	

2. After that log in to the site
